# Welcome To GCTC's #3rd Cyber Security Conference

**Dear Colleagues,**

India's rapid technological evolution is transforming the threat landscape for financial institutions. Digitised services and operations have enabled growth and innovation for the industry, but also exacerbated cyber risks and cybercrime.

Security attacks have evolved and become more complex with a rise in technically advanced scams and non-technology focused attacks that exploit human vulnerabilities. To secure their organisations, financial institutions are continuously on the lookout for new approaches to strengthen their security posture and develop robust cyber hygiene practices against future disruptions.

On July 12-13, 2024 the 3rd Cyber Security Conference will bring together leaders to address the importance of building cyber resilience to strengthen their defences against attacks at the enterprise level.

Join us as we celebrate the success of best practices, learn from real-life lessons and build strategies together to reach the new standard in Cybersecurity.

I look forward to meeting you in-person in the Conference!

**Best regards,**

**Aditya Tikoo**  
Convener-GCTC

## ABOUT US

**Global Counter Terrorism Council(GCTC)** is a registered non-profit, non-partisan international think tank initiated by public spirited individuals to awaken further issues of national interest and global conscience about terrorism as a threat to humanity, human security and global peace. Members from diverse backgrounds like former senior bureaucrats, academicians, former officers from the armed forces and paramilitary services, distinguished former diplomats, leading researchers, media analysts, parliamentarians, human right leaders etc. provide support and regularly contribute to the work of the council, with the aim to deliberate on the root causes of global terrorism and to present effective solutions to the problems faced by society and the government.

## FROM THE PATRON'S DESK

**Dear Participants,**

It is a great honor to extend my greetings and support for this important conference. The theme of the conference is highly relevant in today's world as we are constantly facing new challenges and threats in cyberspace.

Cyberspace has become an indispensable part of our daily lives, and the security of this domain is of utmost importance for the well being of individuals, organizations, and nations. The increasing reliance on technology has also made it a target for malicious actors, who use it to carry out cyberattacks that can cause widespread damage.

Therefore, it is imperative that we bring together experts from various fields to discuss and find solutions to the challenges in cyberspace. I am confident that this conference will provide a platform for participants to exchange ideas, share best practices, and come up with tangible solutions that can serve as suitable policy inputs.

I wish the conference all the success and look forward to hearing about the outcomes and recommendations that emerge from the discussions.

**Kind Regards,**

**Suresh Prabhu**
